Lighting for acrylic canopies
<p>The modern LIGHTLINE design by itself will add flair and functionality to your front door. The typical bow silhouette with its transparent or colour frosted appearance will be an inviting eye catcher.</p>
<p>The price above is for 1 section of the lightline straight edge canopies and 1 is required for each section. It will require a knowledge of electrics to be fitted and or be fitted by an electrician.</p>
<p>Create an additional optical highlight now with the LIGHTLINE lighting element. The low voltage system is safe and easy to assemble. Twenty-one watertight energy-saving flat LEDs per lighting element create an unobtrusive and soft play of colours.</p>
<p>A day/night sensor switches the lighting on or off automatically according to light conditions.</p>
<p>Transformer recommendation: (not included):</p>
<p>Outside: Plug-in transformer, 12V/5W, IP44 (CE, GS or TÜV-certified)</p>
<p>Inside: Every standard 12V/5W transformer can be used</p>
<p>65.56 GBP</p>

Modern Acrylic Door Canopy 1500 x 950
Model 1500 x 950
<p>Modern Acrylic Door Canopy</p> <p>This beautiful modern stainless steel and acrylic canopy comes in a choice of colours. It is very easy to fit and can be fitted with a side panel or side panels. Sidepanels cn be viewed and ordered seperately The price does not include a side panel and this must be added as an optional extra.</p> <p>Lightline Door Canopies</p> <p>Our new stainless steel door canopies and side panel blinds with protective aluminium edges have been designed to be strong and practical, but they also add a neat modern appearance to your home, shop, office, warehouse or factory.</p> <p>An attractive design is what characterizes our Lightline door canopy, slim stylish stainless steel canopy support brackets, aluminium bars and a 4mm acrylic glass sheets were convincingly combined with regard to both their appearance as well as function. Besides protecting it also adds a modern touch to your front entrance.</p>

Our special feature is the click lock system used to secure the curved acrylic glass pane into position, which is integrated into the canopy like a puzzle piece and closed by means of sturdy clamps.

The door canopy range is offered in standard sizes of:

1500mm x 950mm

1900mm x 950mm

2700mm x 950mm

We also offer the Lightline XL for commercial use with a size of: 2050mm x 1500mm

Standard Colour Options

Clear:- The clear door canopy is in a clear glass like finish with polished edges. The clear canopy is suitable with almost any colour building, as the clear sheets do not clash with any other building design colours.

Frosted Blue:- The blue finish is a neat modern looking finish used specifically on waterfront developments preferred by architects.

Frosted Green:- This door canopy helps to blend the house and garden into one.

Frosted White:- The frosted door canopy is a obscured white style finish most suited to areas where a little more privacy may be required from neighbouring properties.Price includes Vat & Free UK Mainland Delivery

American Fridge Filters

Fridge Filter (single)
<p>American Fridge Filters (single)Filter IN STOCK Replacement American Fridge Filter for Samsung, Hotpoint, LG, Bosch, And Many Other. This is a top quality fridge filter, easy to fit and easy to change ensuring that your fridge uses only purified water. Suitable for fridges with external filters and 1/4"(6mm) hoses. The filter will treat up to 1500 US gallons of water but should be changed every 6 months regardless of use to avoid build-up of bacteria in the filter. This filter may also be retro-fitted to fridges with a 6mm water supply pipe such as Neff where no filter is supplied. Ask for details. Compatible With GE GXRTQ LG and Hotpoint BL9808 Samsung EF9603 and WSF100 Daewoo DD7098 Our single filter may also be used as a replacement for the original filter on the following common Samsung fridges: RS21 DC MS1....RS21 DC NS1....RS21 DC SV1.... RS21 FC NS1....RS21 FC SV1....RS21 FG RS1 SS20WG1....SS20WH1....SS20WH2....SS20WH3....SS20WH5....SS20XA1 SS20SH1....SS20SH2....SS20SP1 S24ADESWQ....S24AHESWQN SS20SP2 Or any Samsung which is fitted with original filter model WSF-100 or EF-9603 Also the following GE GXRTQ Daewoo DD7098 For LG fridges this filter may be used to replace the original BL-9808 filter. This filter will provide you with great tasting purified water. This inline filters accept the 6mm (1/4") pipe used on most Fridge Freezers. It comes complete with secure compression fittings to ensure trouble free installation. Two straight connections are supplied for connection to your existing pipework, if a different combination of connections or extra pipe is required then please let us know. This Granular Activated Carbon Filter is composed of High - Performance Activated Carbon; this is effective in removing Chlorine, Odour, Organic Contaminants and Pesticides. This filter has a maximum flow rate of 0.75 GPM, with a maximum pressure rating of 125 PSI. Service life is 1500 gallons. The result is great tasting purified water piped to your Fridge Freezer. American Fridge Filter Replacement American Fridge Filter for Samsung, Hotpoint, LG, Bosch, And Many Other.</p>
12.29 GBP

Fridge Filters (Twin Filters)
<p>American Fridge Filters for Samsung, Hotpoint, LG, Bosch, And Many Other. NOT JUST ONE BUT TWO CARTRIDGES SAVE POUNDS WITH THESE REPLACEMENT FRIDGE FILTERS IN STOCK Each Filter Cartridge has a specific task giving a more effective filtration system than many expensive branded single filter systems. They work in TWO stages the first filter removing dirt and sand and the second purifying and removing chemicals. DON'T BE CONFUSED WITH SINGLE FILTERS WHICH ONLY REMOVE CHEMICALS BUT NOT THE DIRT AND SAND PLEASE READ ON TO GAIN MORE INFORMATION. Types of "American Style Fridges" These are top quality American fridge filters, easy to fit and easy to change ensuring that your fridge uses only clean, fresh, purified water. Suitable for fridges with external filters and 1/4" (6mm) hoses. The filters will treat up to 1500 US gallons of water but should be changed every 6 months regardless of use to avoid build-up of bacteria in the filter. These filters may also be retro-fitted to fridges with a 6mm water supply pipe such as Neff where no filter is supplied. Ask for details. Compatible With GE GXRTQ LG and Hotpoint BL9808 Samsung EF9603 and WSF100 Daewoo DD7098 Our filters may also be used as a replacement for the original filter on the following common Samsung fridges: RS21 DC MS1....RS21 DC NS1....RS21 DC SV1.... RS21 FC NS1....RS21 FC SV1....RS21 FG RS1 SS20WG1....SS20WH1....SS20WH2 SS20WH3....SS20WH5....SS20XA1 SS20SH1....SS20SH2....SS20SP1 S24ADESWQN....S24AHESWQN SS20SP2 Or any Samsung which is fitted with original filter model WSF-100 or EF-9603 Also the following GE GXRTQ Daewoo DD7098 For LG fridges our filters may be used to replace the original BL-9808 filter. These two filters will provide you with great tasting purified water. Each Filter Cartridges has a specific task giving a more effective filtration system than many expensive branded single filter systems. These inline filters accept the 6mm (1/4") pipe used on most Fridge Freezers. They come complete with secure compression fittings to ensure trouble free installation. Two straight and two elbow connections are supplied for connection to your existing pipework, if a different combination of connections or extra pipe is required then please let us know. The First Filter is a Polypropylene Sediment Filter with a 5 micron rating; this catches all the larger particles of Sand, Dirt, and Rust which would otherwise contaminate the second filter. This cartridge has a maximum flow rate of 0.75 GPM, with a maximum pressure rating of 125 PSI. Service life is 1500 gallons. The Second Filter is a Granular Activated Carbon Filter composed of High - Performance Activated Carbon; this is effective in removing Chlorine, Odour, Organic Contaminants and Pesticides. This cartridge also has a maximum flow rate of 0.75 GPM, with a maximum pressure rating of 125 PSI. Service life is 1500 gallons. The result is great tasting purified water piped to your Fridge Freezer. These Filters will be dispatched by first class post normally the next working day.</p>

Customer Comments Just a note to say thank you very much for the canopy. Received a little while ago now but it is now up and looking excellent. Have put our hot tub under it and canopy looks very neat against the wall and is very much part of the garden. Also keeps us dry when raining.

Carports & Canopies -/- Freestanding Carports

<p>3 x 4 Provence Carport</p>
<p>Weatherproof Garden Gazebo, Carport or Hot Tub Cover. The British weather can take its toll on any product that lives outdoors so we decided to make the White Pavilion one tough little cookie. The canopy is 100% waterproof and can stand temperature extremes from -30 degrees celsius to +70 degrees celsius. Snow build up isn't a problem as the smooth outer surface generally cause the snow to slip off as the temperature starts to rise - however, an assembled canopy can support the weight of an average grown man. The metal fixings, nuts and bolts are made from 304 stainless steel to give strength and an almost unlimited life. Wind is the main enemy of gazebos. The White Pavilion Garden Gazebo is certified to withstand wind speeds up to 27 metres per second - that's a force nine gale to you and me. About the Timber frame: The solid White Pavilion Garden Gazebo framework is European Redwood supplied from sustainable resources in Northern Europe and certified by the Forest Stewardship Council (FSC). The Forest Stewardship Council (FSC) is an international organization that brings people together to find solutions which promote responsible stewardship of the world's forests. (Find out more here: www.fsc.org) Your White Pavilion is constructed using Osmose Naturewood pressure treated timber to ensure protection from decay and infestation for many years. Environmentally safe Osmose Naturewood products will initially have a green appearance that highlights the natural variations of the wood; this will weather to an attractive natural honey brown colour before finally fading to a driftwood grey after long term exposure to the sun. Osmose Naturewood products can be painted or stained to match any outdoor colour scheme. Find out more here: www.osmose.co.uk Our distinctive White Pavilion Canopy: As soon as you've spent a dreamy summer's day relaxing under the beautiful ambient glow you get with a White Pavilion gazebo you will realise why we opted for a semi translucent canopy, they also look fantastically welcoming when lit up at night. The stylish PVC translucent canopy is designed for a tough environment, -30 degrees celsius to +70 degrees celsius. It is fitted under tension to give added strength and is 100% waterproof. It allows a soft natural light and gives protection from harmful ultra violet light. The smooth finish is easy to clean, can be simply removed and has a life expectancy of over 10 years. Like to see how tough our canopy material is? Ask for your sample. About the metal fixtures: The stylish contemporary look of the White Pavilion Garden Gazebo partly comes from the exposed stainless steel brackets and base plates which have a brushed finish. The metal fixings, nuts and bolts are made from 304 stainless steel to give strength and an almost unlimited life. Price includes UK Mainland Delivery. Photo shows 3 x 6 option</p>
<p>1692.77 GBP</p>

<p>3 x 6 Andulucia Carport</p>
<p>Weatherproof Garden Gazebo, Carport or Hot Tub Cover Also suitable for play area cover. Price includes Vat & Delivery UK Mainland. The British weather can take its toll on any product that lives outdoors so we decided to make the White Pavilion one tough little cookie. The canopy is 100% waterproof and can stand temperature extremes from -30 degrees celsius to +70 degrees celsius. Snow build up isn't a problem as the smooth outer surface generally cause the snow to slip off as the temperature starts to rise - however, an assembled canopy can support the weight of an average grown man. The metal fixings, nuts and bolts are made from 304 stainless steel to give strength and an almost unlimited life. Wind is the main enemy of gazebos. The White Pavilion Garden Gazebo is certified to withstand wind speeds up to 27 metres per second - that's a force nine gale to you and me. About the Timber frame: The solid White Pavilion Garden Gazebo framework is European Redwood supplied from sustainable resources in Northern Europe and certified by the Forest Stewardship Council (FSC). The Forest Stewardship Council (FSC) is an international organization that brings people together to find solutions which promote responsible stewardship of the world's forests. (Find out more here: www.fsc.org) Your White Pavilion is constructed using Osmose Naturewood pressure treated timber to ensure protection from decay and infestation for many years. Modern Acrylic Door Canopy 1500 x 950
Model 1500 x 950
<p>Modern Acrylic Door Canopy</p> <p>This beautiful modern stainless steel and acrylic canopy comes in a choice of colours. It is very easy to fit and can be fitted with a side panel or side panels. Sidepanels can be viewed and ordered separately The price does not include a side panel and this must be added as an optional extra.</p> <p>Lightline Door Canopies</p> <p>Our new stainless steel door canopies and side panel blinds with protective aluminium edges have been designed to be strong and practical, but they also add a neat modern appearance to your home, shop, office, warehouse or factory.</p> <p>An attractive design is what characterizes our Lightline door canopy, slim stylish stainless steel canopy support brackets, aluminium bars and a 4mm acrylic glass sheets were convincingly combined with regard to both their appearance as well as function. Besides protecting it also adds a modern touch to your front entrance.</p> <p>Our special feature is the click lock system used to secure the curved acrylic glass pane into position, which is integrated into the canopy like a puzzle piece and closed by means of sturdy clamps.</p> <p>The door canopy range is offered in standard sizes of:</p> <p>1500mm x 950mm</p>

1900mm x 950mm

2700mm x 950mm

We also offer the Lightline XL for commercial use with a size of: 2050mm x 1500mm

Standard Colour Options

Clear:- The clear door canopy is in a clear glass like finish with polished edges. The clear canopy is suitable with almost any colour building, as the clear sheets do not clash with any other building design colours.

Frosted Blue:- The blue finish is a neat modern looking finish used specifically on waterfront developments preferred by architects.

Frosted Green:- This door canopy helps to blend the house and garden into one.

Frosted White:- The frosted door canopy is a obscured white style finish most suited to areas where a little more privacy may be required from neighbouring properties. Price includes Vat & Free UK Mainland Delivery

Door Canopies -/- Timber Door Canopies

Ashcombe Timber Door Canopy
<p>ASHCOMBE TIMBER DOOR CANOPY</p> <p>Price includes vat and delivery</p> <p>Everyone has seen the beautiful old Timber door canopies still to be found in villages and Towns throughout the country.</p> <p>For hundreds of years, decorative woodwork has been used to enhance otherwise plain cottages and houses, but the practice came to an end in the thirties. Since then we have had decades of unattractive, plain housing design, unrelieved by any decorative features. This is a movement certain to continue as builders and home owners seek to improve the value and appearance of their homes.</p> <p>Fitting an all-timber canopy gives immediate visual impact, and a cosy, homely and welcoming atmosphere as you approach the front door. The Timber canopies you see replicate as closely as possible the patterns created in the last century, often by local carpenters - styles which seem well-proportioned, graceful yet functional.</p> <p>Your Timber canopy would be delivered part-assembled for ease of fitting, except for the tiles. Full instructions are included fitting your Timber door canopy is well within the capacity of the average handyman.</p> <p>Finishing</p> <p>All timber canopies are supplied unfinished, or can be primed for a small charge. Timber Canopies were traditionally painted white or stained a dark oak shade, but any good quality paint or coloured preservative finish properly applied will ensure a long trouble free life.</p> <p>Tiling</p> <p>Ideally the Timber door canopy should be tiled to match the main roof tiles or slate. It can however be left felted, using mineral coated felt. A good seal must be made between the roof and the wall with either a mortar or flashing.</p> <p>PRICE DOES NOT INCLUDE TILES OR LEAD FLASHING</p> <p>PRICE INCLUDES VAT AND DELIVERY</p>

Eastacombe Timber Door Canopy
Model Eastacombe
EASTACOMBE DOOR CANOPY
<p>CLICK HERE FOR SIZES</p>
<p>Everyone has seen the beautiful old Timber door canopies still to be found in villages and Towns throughout the country.</p>
<p>For hundreds of years, decorative woodwork has been used to enhance otherwise plain cottages and houses, but the practice came to an end in the thirties. Since then we have had decades of unattractive, plain housing design, unrelieved by any decorative features. This is a movement certain to continue as builders and home owners seek to improve the value and appearance of their homes.</p>
<p>Fitting an all-timber canopy gives immediate visual impact, and a cosy, homely and welcoming atmosphere as you approach the front door. The Timber canopies you see replicate as closely as possible the patterns created in the last century, often by local carpenters - styles which seem well-proportioned, graceful yet functional.</p>
<p>Your Timber canopy would be delivered part-assembled for ease of fitting, except for the tiles. Full instructions are included fitting your Timber door canopy is well within the capacity of the average handyman.</p>
<p>Finishing</p> <p>All timber canopies are supplied unfinished, or can be primed for a small charge. Timber Canopies were traditionally painted white or stained a dark oak shade, but any good quality paint or coloured preservative finish properly applied will ensure a long trouble free life.</p>
<p>Tiling</p> <p>Ideally the Timber door canopy should be tiled to match the main roof tiles or slate. It can however be left felted, using mineral coated felt. A good seal must be made between the roof and the wall with either a mortar or flashing.</p>

Energy Saving Devices

V Phaze energy saver

V Phaze energy saving device

What savings could I make?

The voltage supplied to your home or business needs to vary to ensure that the distribution network works effectively, offering the best supply to all users at all times. Across Europe the agreed statutory range for voltages is based on 230V +/-10% (207V to 253V). In the UK our voltages have historically been higher and whilst actual levels will vary during the day they typically average at around 245V. The majority of appliances operate more efficiently at lower voltage (but still within the European statutory range). Voltage Optimisation is the control of voltage supplied to appliances to a set level (usually 220V). Presented below are example energy savings achieved in VPhaze testing and based upon 245V to 220V voltage reduction.

*Appliances with motors and pumps

A' rated freezer = 17% energy saving

A' rated refrigerator = 16% energy saving

3 speed central heating pump = 15% to 18% energy saving

Lighting

CFL lighting = 11% energy saving

Incandescent bulb = 15% energy saving

Low voltage halogen spot lights = 15% energy saving

Consumer electronics

DAB radio = 5% energy saving

DECT cordless phone base station = 30% energy saving

ADSL modem and wireless router = 5% energy saving

Fridge Filters

American Fridge Filter (single)
Model PUR1
<p>INC VAT & DELIVERY American Fridge Filters (single) Filter IN STOCK Replacement American Fridge Filter for Samsung, Hotpoint, LG, Bosch, And Many Other. This is a top quality fridge filter, easy to fit and easy to change ensuring that your fridge uses only purified water. Suitable for fridges with external filters and 1/4" (6mm) hoses. The filter will treat up to 1500 US gallons of water but should be changed every 6 months regardless of use to avoid build-up of bacteria in the filter. This filter may also be retro-fitted to fridges with a 6mm water supply pipe such as Neff where no filter is supplied. Ask for details. Compatible With GE GXRTQ LG and Hotpoint BL9808 Samsung EF9603 and WSF100 Daewoo DD7098 Our single filter may also be used as a replacement for the original filter on the following common Samsung fridges: RS21 DC MS1....RS21 DC NS1....RS21 DC SV1.... RS21 FC NS1....RS21 FC SV1....RS21 FG RS1 SS20WG1....SS20WH1....SS20WH2 SS20WH3....SS20WH5....SS20XA1....SS20SH1....SS20SH2....SS20SP1 S24ADESWQN....S24AHESWQN SS20SP2 Or any Samsung which is fitted with original filter model WSF-100 or EF-9603 Also the following GE GXRTQ Daewoo DD7098 For LG fridges this filter may be used to replace the original BL-9808 filter. This filter will provide you with great tasting purified water. This inline filters accept the 6mm (1/4") pipe used on most Fridge Freezers. It comes complete with secure compression fittings to ensure trouble free installation. Two straight connections are supplied for connection to your existing pipework, if a different combination of connections or extra pipe is required then please let us know. This Granular Activated Carbon Filter is composed of High - Performance Activated Carbon; this is effective in removing Chlorine, Odour, Organic Contaminants and Pesticides. This filter has a maximum flow rate of 0.75 GPM, with a maximum pressure rating of 125 PSI. Service life is 1500 gallons. The result is great tasting purified water piped to your Fridge Freezer. American Fridge Filter Replacement American Fridge Filter for Samsung, Hotpoint, LG, Bosch, And Many Other.</p>
12.29 GBP

Replacement filters for 2 stage water system
<p>2 X Replacement Filters For 2 Stage Water Filter System Each Filter Cartridge has a specific task giving a more effective filtration system than many expensive branded single filter systems. The two cartridge filters come complete with secure compression fittings to ensure trouble free installation. Two straight and two elbow connections are supplied for connecting the pipework and filters, if a different combination of connections or extra pipe is required then please get in touch. The First Filter is a Polypropylene Sediment Filter with a 5 micron rating, this catches all the larger particles of Sand, Dirt, and Rust which would otherwise contaminate the second filter. This cartridge has a maximum flow rate of approx 2.5 litres per minute and a service life of approx 5000 litres. The Second Filter is a Granular Activated Carbon Filter composed of High - Performance Activated Carbon, this is effective in removing Chlorine, Odour, Organic Contaminants and Pesticides. This cartridge also has a maximum flow rate of approx 2.5 litres per minute and a service life of approx 5000 litres. THE RESULT IS GREAT TASTING PURIFIED WATER ON TAP. This Items Price Includes Postage to a UK Mainland Address. Customers From the Scottish Highlands, Offshore and Overseas Please Contact us for Postage Costs Before Purchase.</p>

Gazebos

<p>3 x 3 Tuscan Gazebo without sidewalls</p>
<p>Model Tuscany</p>
<p>3m x 3m &nbsp;White Top Solid Gazebo&nbsp;Please ring for delivery charge in your area.White Top Gazebo -&nbsp;3m x 3m / 95 sq ftFor the smaller garden, will offer ample room for your hot tub or spa or as a seating area for up to 10 people.Frequently asked questionsQuestions about the CanopyWhat is the canopy material?&nbsp;The pvc membrane designed for the commercial tent and marquee trade is a tensile fabric structure that makes it possible to create dramatic, exciting and striking canopies as it offers translucency, is lightweight and uses tension to create the three dimensional form.&nbsp;Can the canopy cope with freezing temperatures?&nbsp;A White Pavilion canopy is designed for a tough environment, -30; celsius to +70;celsius&nbsp;How long will the canopy last?&nbsp;The canopy is guaranteed for 2 years but is expected to last over 10 years&nbsp;Does the white canopy need much cleaning and does it clean easily?&nbsp;Unlike a canvas material, the smooth surface makes the canopy almost self clean when it rains. We would recommend removing bird dropping as soon as possible. Use very dilute mild detergent and thoroughly rinse off, a few times a year - do not use abrasives, solvents or a power washer.&nbsp;Can the canopy be removed during the winter?&nbsp;Many of our customers like to use their White Pavilion gazebo all year round; the canopy can be simply removed by undoing the fastening bolts, a five-minute job. Replacement is just as easy.&nbsp;Does the white canopy allow much light through?&nbsp;The White Pavilion unique feature is its translucent canopy. This allows a soft light and gives ultra violet protection from the sun, particularly beneficial to schools for their outdoor classrooms.&nbsp;Why is there no guttering? Do I need guttering?&nbsp;With the small roof area, the amount of rain collected, the drip off is limited. However, you can attach a silicon beading to the canopy above an entrance bay, which will direct the run off water to the side.&nbsp;I am planning to use my gazebo for BBQ's. Is it safe and can the canopy or screen catch fire?&nbsp;The pvc material has passed all the relevant fire safety standards for the UK and Europe. It is safe to barbecue under a White Pavilion gazebo, just take the usual sensible precautions.&nbsp;Questions about the Timber FrameWhy does my timber vary in colour between brown and light green and what will be the final colour?&nbsp;All timber has natural variations in colour, which can be exaggerated after the preservative treatment process. The pressure treatment process gives a light green tinge, which will soon turn a natural honey brown before finally fading to a driftwood grey after long-term exposure to the sun.&nbsp;What type of timber is it and where does it comes from?&nbsp;We only use European Redwood (pinus sylvestris) imported from Sweden.&nbsp;Is the timber from an environmentally responsible company?&nbsp;New Improved DesignAfter using the industry standard timber for many years we have changed the timber frame construction from a solid timber to &nbsp;Glulam&nbsp;structural timber sometimes referred to as engineered timber.&nbsp;Glulam&nbsp;is a stress-rated engineered wood product comprised of wood laminations that are bonded together under high pressure and heat with strong waterproof adhesives. &nbsp;At&nbsp;White Pavilion&nbsp;we use a three laminate timber with the resulting product being stronger and more stable than solid timber and so less prone to splits and shakes.In today's modern construction industry this proven product is often first choice by designers because of it's aesthetic appeal and strength.&nbsp;.&nbsp;Questions about the MetalworkWe live very close to the coast. Will exposure to salt air damage the metal parts?&nbsp;Our stainless steel fittings will not rust in fresh water or sea atmosphere. Under some atmospheric conditions tarnishing can occur which can be easily removed with detergent and a stiff nylon brush.Questions about the Side ScreensHow easily do the screens go on and can they be removed?&nbsp;Screens are supplied with stainless steel marine quality turnbuttons that allow for permanent or temporary attachment.&nbsp;Are transparent panels easily damaged?&nbsp;The transparent panels are made from a commercial quality material but by their nature are not as robust as the pvc material. When not in use we recommend either hanging up or rolling up</p>

dry. Questions about Heating Please note that we recommend all electricians are fitted by a professional electrician. Can I use my own heating system? The intense heat from gas heaters could lead to canopy damage. There are a number of infrared heaters on the market but after extensive testing the only heater we know that will not damage the timber and the canopy is a Solamagic^a infrared heater, which we can supply. Do I need to worry about the infrared heater being outside? The HeatLight 1500w heater we recommend is IP 55 rated, which means it can be fitted outside. Do I need any extra safety features? For added safety, we recommend the fitting of a residual circuit breaker type C. Questions about Lighting Please note that we recommend all electricians are fitted by a professional electrician. Can you recommend how I can hide the electric cables? All White Pavilion gazebos have a discrete channel, which hides light, heater and speaker cables. Is it easy to fit the lights and heater myself? The fitting is straightforward but we would always recommend using a qualified electrician. Questions about Weather Is my White Pavilion safe in high winds? The style of our gazebos allows the wind to freely pass through. They are designed to resist high winds and are certified to withstand gale force 9; the screens can also be removed to give added stability. If you are concerned about extreme high winds the canopy can easily be removed. How much snow weight can the canopy take? Not an issue because of the strength of the construction and the exceptionally strong canopy. It can take the weight of a person, in fact with its smooth surface snow slides off. Questions about Planning Permission Do I need to apply for planning permission? Planning permission is not usually required, even in defined Areas of Outstanding Natural Beauty. A White Pavilion Garden Gazebo is viewed as being similar to a greenhouse or garden shed. If you are unsure we would suggest you contact your local planning office. Questions about installation How easy is it to install and how long will it take? A White Pavilion comes complete with all the fixings, instructions and pre drilled timber. This makes installation quite easy for the average DIY person. We would suggest a two-person team, our two smaller gazebos take about half a day to install. Does the gazebo need attaching to the ground? To make it more secure we include special bolts for attachment to your chosen base. Can it be moved easily? Our White Pavilion Garden Gazebos are designed to be dismantled and reinstalled. Don't leave it behind when you move house. Can you install it for me? We have a number of recommended installers who can also lay down timber decking and construct patios. Back to top Questions about Maintenance How do I keep my White Pavilion looking good? A wash with a dilute mild detergent a few times a year will keep it looking good. Best to remove bird dropping as soon as possible. Any ongoing maintenance? Temperature changes can occasionally lead to the slackening of a nut. We suggest you check your nuts once or twice a year. Regularly check and clear drain holes in each rafter. Questions about Returns Can I return a product to you? If you feel dissatisfied in any way of course you can. We need total customer satisfaction. Subject to your statutory rights under the Consumer Protection (Distance Selling) Regulations 2000 any amendments, are not affected by any of our terms and conditions. Robus Lights Each = £89 (as below) HeatLight 1500w Heater £218

Ladders -/- Diy Ladders

Xtend & Climb Home Telescopic Ladder
<p>Xtend & Climb Telescopic Ladder, Robust anodised aluminium Suitable for all commercial applications Stores & transports at a compact 0.81m Open up to desired working length Fits in any car boot or cupboard Optional carry-case available Very popular with surveyors EN 131 Price does not include vat &nbsp; WARNING NOTICE Inferior Chinese Telescopic Ladder Copies on Ebay & the Internet We are aware of cheap and not so cheap telescopic ladder copies for sale on auction sites such as Ebay. Customers should be aware that the Xtend & Climb telescopic ladder is a highly engineered product, tested to EN131 European Standards. The cheap telescopic ladder copies are sold to people thinking they are buying the same, which they are not. Buying the Xtend & Climb telescopic ladder from any of the approved resellers guarantees you a safe well made product. Note that it may take up to 28 days from some suppliers, whereas you can get your legal Xtend & Climb telescopic ladder next day from &nbsp; Ladders Online The Xtend & Climb telescopic ladder is the brilliant alternative to the traditional extension ladder. The original Xtend & Climb has proven to be the most popular telescopic ladder on the market - storing at &nbsp; 0.81m (3ft), extending to &nbsp; 3.8m (12.5ft) &nbsp; and weighing a mere &nbsp; 13.7kg (30.2lbs). The ability to store a ladder in the most confined of spaces and to quickly and easily open it up to the exact height needed, has made the Xtend & Climb an invaluable tool. New developments at Xtend & Climb Telescopic Ladders The all new Xtend & Climb Pro and Xtend & Climb Home telescopic ladders are the next stage in innovation for Xtend & Climb. The ergonomics have been further improved, for more comfort and precision - giving smoother performance. Armadillo body protection
What is it?You're vulnerable...every single time you set foot on the pitch.Vulnerable because conventional shin guards do nothing to protect the back of your legs from calf injury through impact and stud raking.But why expose your calf muscles, your Achilles and all the soft tissue at the back of your leg, when Armadillo can help shield you from damage? Super lightweight, super flexible and super resilient, the Armadillo calf protector uses multiple overlapping Aridite® plates to significantly reduce the risk of injury by diffusing impact energy.Like a breathable 'second skin' that 'shapes' to your leg this calf and Achilles protector is so comfortable, you'll hardly know it's there.Full time Pro, Sunday League player, Junior beginner...every time you put on your boots, put on Armadillo. http://www.armadillo-sports.com

out a price for you. if you are looking for something completely different then please contact us for more information about what is possible.What is the order process?Once you have decided on the log cabin you would like please add it to your basket and continue on to the checkout and pay for your order. When we receive your order we will then send out a confirmation letter detailing your order and asking you to check it for mistakes. You will also receive a base plan, a delivery form and an invoice. We will contact you separately regarding a delivery date. You will need to fill in the delivery form and send it back to us. What are the delivery times?Delivery times do vary throughout the year. Please contact us or your local agent for an up to date estimate.Are there any delivery charges?All other areas free. There is a delivery charge to some areas of the UK, this is simply to cover the extra cost of fuel&#pound;50.00 - Avon, Berkshire, Borders, Dorset, Dumfries & Galloway, Dyfed, W. Glamorgan, M. Glamorgan, S. Glamorgan, Gwent, Hampshire, Lothian, Oxfordshire, Somerset, S. Strathclyde, Wiltshire&#pound;70.00 - Bedfordshire, Buckinghamshire, Cambridgeshire, Essex, Hertfordshire, Kent, Middlesex, Norfolk, Surrey, W. Sussex, E. Sussex, Suffolk&#pound;90.00 - Greater London&#pound;100.00 - Central, Cornwall, Devon, Fife, Grampian, Highland, N. Strathclyde, TaysideNon-mainland - please contact us to enquireALL OTHER AREAS ARE FREEWhat happens on delivery?Our log cabins are usually delivered using a 7.5 ton lorry. The cabin is loaded by hand so we can check it over and make sure all the parts are there and are in good condition. The cabin will be offloaded by hand. We will usually carry the parts to your base area if the access is good and its not too far away. If the cabin is for self-build it is best not to have it delivered until you area ready to start building it as the parts should not be stored outside.What if Astwood are building it for me?We will start building as soon as the building has been unloaded. We have all our own tools but it is an advantage if we are able to access electricity - we have an extension cable. You do not need to be home whilst your log cabin is being built although it can help if you or someone on your behalf are there for a short time while we start so we can check details such as where the cabin should be positioned on your base etc.What base do I need?Your base must be flat, level and solid. The best materials to use are concrete paving flags or a full concrete slab. It is possible to use other things but please check with us or your agent first. Base plans are available for each log cabin.What tools are required?You will need at least a sprit level, tape measure, hammer, rubber mallet (so you dont mark the wood), electric screwdriver/drill, saw, stanley knife.What access do you need?We will need to know some details about access for delivery and/or building on the delivery sheet that we send out. Most problems can be solved but we do need to know about them in advance. If you are unsure about access please contact us or your local agent.Is credit available?At the present time we are not offering any credit facilitiesDoes my cabin need treating?Your log cabin will need to be treated as soon as possible after construction with a good quality, spirit based wood preservative. The bearers and decking (where applicable) have already been treated so there is no need to re-do those unless you prefer to. Ensure you treat all the bare external wood, particularly at the joints. You can treat the inside too if you like. It is possible to use a transluscent preservative as a pre-treatment (inside and out) but we do not recommend using translucent products on their own - only coloured wood preservatives prevent damage to the wood from the sun's UV rays. It is best to follow the manufacturers guidelines on quantity, application, number of coats, re-treatment etc.

2300.00 GBP

Is credit available? At the present time we are not offering any credit facilities

Does my cabin need treating? Your log cabin will need to be treated as soon as possible after construction with a good quality, spirit based wood preservative. The bearers and decking (where applicable) have already been treated so there is no need to re-do those unless you prefer to. Ensure you treat all the bare external wood, particularly at the

joints. You can treat the inside too if you like. It is possible to use translucent preservative as a pre-treatment (inside and out) but we do not recommend using translucent products on their own - only coloured wood preservatives prevent damage to the wood from the sun's UV rays. It is best to follow the manufacturers guidelines on quantity, application, number of coats, re-treatment etc. Can I build it myself? Any able bodied person with a general knowledge of DIY should be able to build their own log cabin. We can provide a general set of instructions and a numbered plan and of course we are always available on the phone for advice. You will need at least 2 people to build the cabin and you should make sure you are using tools, ladders etc safely. Guarantees? Wood is a natural product and will be subject to movement and weathering as it seasons. It is not uncommon for it to have knots and small splits (called shakes). This is nature at work and will not be considered a fault. We check the cabin over before delivery to make sure there are no missing or damaged parts. Your statutory rights are not affected. What might happen to the wood then? Wood is a natural product and will be subject to movement and weathering as it seasons. During the first few weeks after construction the logs will settle. This can cause the windows and doors to become out of shape and/or stiff to open, gaps may appear above the frames. All of these things can be sorted out with small adjustments. Through the seasons the wood will expand and contract due to moisture content, again this can cause the doors and windows to become a little stiff. It is not uncommon for wood to have knots and for small splits to occur (called shakes). You can seal the knots with a sealant if you prefer. This is all nature at work and should not be considered a fault. Do I need planning permission/building regulations? Under new regulations that came into effect on 1 October 2008 outbuildings, such as log cabins, are considered to be permitted development, not needing planning permission. However this is subject to certain limits and conditions. See the Governments Planning Portal website for further information <http://www.planningportal.gov.uk/england/public/buildingwork/projects/workcommonoutbuildings/> If the floor area is between 15m² and 30m², you will not normally be required to apply for building regulations approval providing that the building contains NO sleeping accommodation and is at least one metre from any boundary. If in any doubt about planning permission or building regulations please check with your local authority. If you do require the technical specifications of your chosen log cabin we will be happy to provide you with them. What hardware is provided with the log cabin? All door and window handles, locks, catches and hinges are supplied as standard. The cabin walls do not require fixing together but you will need nails/screws to fix the roof, floor and trims and bolts for the weather bars. Some people prefer nails and some prefer screws so we leave it to you to buy whichever you would prefer. You will not require anything that you cannot buy from any good hardware store but please use galvanised products so they do not rust. Full Terms & Conditions Local Authority Approval - You may need to obtain Planning Permission or comply with Building Regulations. Your agent may be able to offer advice on such matters but it is ultimately your responsibility to check with your relevant local authority. Base Requirements - Your building will need to be sited on a flat, level, solid base - usually full concrete or concrete paving slabs are best. The base must be the correct size and take into account any veranda. When positioning your base please be aware of overhangs to front, rear and sides. Your agent may be able to give you advice or assistance with your base but it is ultimately your responsibility to ensure it is suitable. If a base that is not suitable for the building then the building may be taken away and re-booked into the delivery schedule so you have time to make good the base. There will be a charge for this. The final decision on the suitability of the base will be made by the construction team. If someone other than Astwood is constructing the cabin we will not accept any liability relating to subsequent problems that may arise with the building due to a poor base or construction technique. The Products - In an effort to continually improve and update our products specifications and/or colours may vary from the actual products, packaging or contents shown. Buildings - We reserve the right to make changes to the buildings or substitute like with like at any time without notice. It must be remembered that wood is a natural product and will be subject to movement and weathering as it seasons. It is not uncommon for it to have knots and for small splits to occur (called shakes). This is nature at work and will not be considered a fault. All measurements are approximate. You must treat your building within 7 days of delivery with a good quality wood stain to prevent deterioration. Roofing - the building is supplied with a

bare wooden roof. It is your responsibility to ensure that you properly cover the roof with a suitable waterproofing material. If we supply you with a roof covering it must be fitted according to the relevant manufacturers guidelines. Payment - Full payment for the Products must be received from you, or your agent on your behalf, prior to delivery. We accept cash, cheque and credit/debit cards. Cancellations up to and including seven days before the delivery date will not attract any penalty charges. If you cancel the order after this time you will be liable for a cancellation charge to cover administrative and handling costs. You should inspect the goods on delivery and notify us of any defects as soon as possible and within seven days otherwise you will accept the goods. Risk will pass to you on delivery.Delivery - Once payment has been received from you, or your agent on your behalf, we will deliver your building according to our delivery schedule. Most of our deliveries take place on the promised day but we cannot accept any liability for delays caused by unforeseen circumstances. All dates and times given are estimates and time is not of the essence of the contract. It is your responsibility to ensure that our delivery team have access to the area the building is to be sited and that we are made aware of any difficulties with access as soon as possible before the delivery i.e. parking problems, long distances etc. You should ensure that any personal property is removed from the area (base site and access paths) or otherwise protected. If the delivery team cannot access the area the building may be taken away and redelivered. There will be a charge for this. You do not need to be at home when the delivery takes place as long as we have access and any information regarding where the building is to be put and window/door positions if relevant. If the building is not being constructed straight away you will need to make sure you have a suitable storage place ideally in a garage or under a tightly secured heavy duty tarpaulin. We cannot accept any liability for problems caused by incorrect storage after delivery.Guarantees - As far as we are able to do so we will give you the benefit of any guarantees made by the manufacturer as long as any conditions they stipulate are met. This does not affect your statutory rights.Law - Any claims brought against us, except for death or personal injury, will be limited to the value of the contract and we will not be liable by way of indemnity, breach of contract, tort or breach of statutory duty or any other manner, for consequential or indirect losses. This contract is subject to English Law.

Security Locks

High Security Cylinder Lock
<p>High Security Cylinder Locks for PVCu Doors Composite Doors & Patio Doors Beat The Burglar Protect Your Home Against the Latest Crime Cylinder Bumping and Cylinder Snapping. How Secure Are Your Doors? If you've got a PVCu or Composite type Door with a Multi-Point Locking System your door is locked, the locking mechanism is engaged, your home and possessions are Safe - or are they? Unfortunately your Multi-Point Locking System is only as efficient as your Cylinder, which is under a new threat of Cylinder Snapping and Cylinder Bumping techniques now being used by thieves to enter our homes. It can take as little as a minute to open a PVCu or Composite type Door fitted with a conventional lock cylinder, and to the experienced thief, sometimes less. Is Your Home Bump & Snap Resistant? Cylinder Bumping leaves no visible signs of forcible entry for homeowners. Potentially Insurance Companies often refuse to pay out, leaving the victim out of pocket. If the Cylinder is Snapped or Bumped - Then the security is breached! Don't be a Statistic of crime - Secure your Doors. 37p Lock Article Snide Burglary Technique On The Increase Lock Bumping thieves can get into your home. Click Here to see a video on lock bumping & Lock Snapping. Lock snapping doesn't carry the same mystique as lock bumping but it is equally effective. Thieves can break into your home within a matter of seconds by simply applying enough force to the cylinder lock, usually with a pair of mole grips or a claw hammer, and snapping it at its weakest point. Lock snapping obviously leaves much more evidence of a break in than lock bumping, but the result is the same. The Solution Lock Bumping and Lock Snapping of traditional cylinder locks is a constant threat and a well-publicised high security risk. Consequently, certification PAS24 has been upgraded to reflect these changes. Now from just £36.00 per door. Gege pExtra 24 Euro Cylinder The Pextra24 is a premium Kitemark approved cylinder with the anti-snap solution offer you greater protection. The existing security features are greatly enhanced with an additional reinforced steel plate which significantly increases the cylinders resistance to sapping when under attack. This applies when fitted without any additional security rose or security handle. The pExtra24 security cylinder has a patented branch groove that cannot be copied with common key milling machines like Bosch "Easy Entry". The optional blocking pin recognizes if an illegally made duplicate key has been inserted into the cylinder. If the branch groove is missing, the blocking pin moves into the key profile and prevents the cylinder from being turned in one direction. Features Protected by several Austrian patents. Meets EN1303 key Related Security Grade 4, and with the blocking pin, key related Security Grade 6. EN1303 Attack Resistance Grade 2 (optional). The blocking pin prevents unlocking with illegally produced duplicate keys. The patented centering pin prevents opening by the Bumping method. Protected against picking by an overlapping key profile and special tumbler keys. Anti-drilling protection by additional steel security elements in the cylinder housing and barrel. Increase in permutation capacity with side elements. Areas of Applications Offices and practices. Apartment complexes and private homes. Business and industrial sites. Airports, public transport. Hospitals. Advantages Investment security - the master key system can be expanded at any time and can be integrated into electronic locking systems. Organization - the customer determines in the master key system which key opens door(s). Flexibility - by versatile application possibilities. EN 1303 classification attack resistance covers: Resistance to drilling. Resistance to chisel attack. Resistance to twisting attack. Resistance to plug/cylinder extraction. Enhanced resistance to attack through additional SBS cuts. The pExtra 24 is: Available in cyl/turn and key/key options. Available in Euro profile. Protect your Home & Valuables.</p>

3724.75 GBP

Smoking Shelter (Fully Installed)
Model SSHBS1
Fully Installed Smoking Shelter
Price: £2595.00 (£3,049.13 including VAT at 17.5%)

2m long x 2.5m deep to cater for 6 people.

Price includes full installation by us on tarmac or concrete surface.

Complies with current legislation in Scotland and Ireland governing Smoking Shelters and also the impending legislation soon to be brought into England and Wales on 1st July 2007.

Probably the strongest shelter available in its price range.

We fully assemble this shelter on site for you. No extra costs or time wasted in waiting for construction unlike other shelters. Purchase and use immediately.

All aluminium construction with Polycarbonate sides and roof. The frame is made from 80x80mm Aluminium box section to BS1474 1987/6082T6.

The glazing is 5mm Polycarbonate on all 3 sides. The roof will be supplied with 6mm thick twin wall Polycarbonate.

Framework comes in a Silver Powder Coated finish as standard. Other colours available as required.

Corporate identify transfer service available.

Adjustable legs to allow for fitting to uneven ground.

Free perch rail seat constructed from galvanized steel.

Can be installed into tarmac which saves the need for concrete base.

Gutter sections front and back to catch rainwater from domed roof which prevents snow build up and water build up and is easier to keep clean than a flat roof.

This new smoking shelter is designed to withstand whatever the British weather can throw at it, and look good at the same time.

They allow employers to provide designated smoking areas away from main entrances and exits.

FREE DELIVERY AND INSTALLATION FOR MAINLAND UK. LEAD-TIME APPROX. 4/5 WEEKS.

Thatched Building Individual Designs

Design Service

Apart from the standard range of thatched structures and products available on this website, we can arrange for a quotation to design and build virtually any thatched structure.

These products consist mainly of circular or oval roof sections with hexagonal or octagonal bases. However all products can be made in different shapes, sizes and designs. They can also be made with or without a floor or raised off the ground on posts.

If you have any particular design requirements please do not hesitate to contact us on:

01823 254843 or Email sales@cswshopping.co.uk

Thatched Gazebo 2.7 Gazebo(Fully Installed)
<p>This 2.7m thatched gazebo includes: base, flooring, poles, handrails, roof rails, roof frame and African cape reed thatch roof. Fully installed on site by professional fitters. Includes any necessary preparatory groundworks.</p> <p>Additional Info:</p> <p>Further Information</p> <p>This 2.7m thatched gazebo - fully installed</p> <p>This item can be fully installed to a cleared clear area it does not require a concrete base. Please ring or email for more details. Alternative sizes and designs to suite your individual requirements can often be achieved.</p> <p>Further Information</p> <p>2.7m thatched gazebo - fully installed</p> <p>It is also important that your chosen site has good drainage and is on solid ground. Preferably the site should be on a firm level ground. If the structure is to be installed on a slope, please inform us prior to installation. All our structures are supported on round poles and we can supply longer pole supports to create a level base.</p> <p>After determining the location, clear the construction area. Remove all debris, roots, flowers, plants, grass and any large rocks. If the ground has been excavated and refilled with aggregate or soil, please make sure it has been packed down firmly. If you intend to install a hot tub in your structure, you may want to consider a concrete foundation instead.</p> <p>Please Note: The cost of each thatched structure supplied and fitted on site assumes that the construction area is level, on solid ground and cleared of all debris. If the construction area is not then additional cost may be incurred.</p> <p>During the construction of your thatched structure, you may have to take measures to protect your garden and any landscaping. If traffic across your grass and landscaping is inevitable, our fitters will take all steps to protect your garden. Please make the members of our construction team aware of any prized plants and flowers! If it is impossible to sidestep any of your cherished plants or shrubs during construction, it may be wise to dig them up for relocation. Naturally, the best way is to do your landscaping around the thatched structure after construction.</p>

Water Filters

2 Stage water filter upgraded Faucet.

Model 2 stage

2 Stage Water Filter with up graded Faucet as seen in picture. Why pay for bottled water when you can have filtered water on tap. THIS FILTER SYSTEM COMES COMPLETE WITH ALL CONNECTIONS AND FITTINGS.

1. A Quick Connect Self Sealing Valve for Connection to Your Mains Water Supply.

2. A Long Reach Chrome Faucet.

3. Two Metres of Tubing, (More can be supplied if needed).

4. Two Cartridge Filters perfectly matched to give you Great Tasting Water.

Each Filter Cartridges has a specific task giving a more effective filtration system than many expensive branded single filter systems.

The two cartridge filters come complete with secure compression fittings to ensure trouble free installation.

Two straight and two elbow connections are supplied for connecting the pipe work and filters, if a different combination of connections or extra pipe is required then please get let us know.

The First Filter is a High Capacity Polypropylene Sediment Filter with a 5 micron rating; this catches all the larger particles of Sand, Dirt, and Rust which would otherwise contaminate the second filter. This cartridge has a maximum flow rate of 0.75 GPM with a maximum pressure rating of 125 PSI.

The Second Filter is a Granular Activated Carbon Filter composed of High - Performance Activated Carbon; this is effective in removing Chlorine, Odour, Organic Contaminants and Pesticides. This cartridge also has a maximum flow rate of 0.75 GPM with a maximum pressure rating of 125 PSI, service life is 1500 gallons.

Water Purifiers & Filters -/- American Fridge Filters

Replacement filters for 2 stage water system
<p>2 X Replacement Filters For 2 Stage Water Filter System Each Filter Cartridge has a specific task giving a more effective filtration system than many expensive branded single filter systems. The two cartridge filters come complete with secure compression fittings to ensure trouble free installation. Two straight and two elbow connections are supplied for connecting the pipework and filters, if a different combination of connections or extra pipe is required then please get in touch. The First Filter is a Polypropylene Sediment Filter with a 5 micron rating, this catches all the larger particles of Sand, Dirt, and Rust which would otherwise contaminate the second filter. This cartridge has a maximum flow rate of approx 2.5 litres per minute and a service life of approx 5000 litres. The Second Filter is a Granular Activated Carbon Filter composed of High - Performance Activated Carbon, this is effective in removing Chlorine, Odour, Organic Contaminants and Pesticides. This cartridge also has a maximum flow rate of approx 2.5 litres per minute and a service life of approx 5000 litres. THE RESULT IS GREAT TASTING PURIFIED WATER ON TAP. This Items Price Includes Postage to a UK Mainland Address. Customers From the Scottish Highlands, Offshore and Overseas Please Contact us for Postage Costs Before Purchase.</p>

Single American Fridge Filter Replacement
<p>FRIDGE FREEZER WATER FILTER FOR AMERICAN STYLE FRIDGES A Brand New Replacement Water Filter for Samsung, Hotpoint, LG, Bosch, And Many Other Types of "American Style Fridges" The price of this Item includes postage to a UK mainland address. Customers From The Scottish Highlands or Overseas Please Contact us For Postage Cost Before Purchase. Our Filters are supplied hermetically sealed to secure against the entry of microorganisms and to maintain the safety and quality of their contents. This is a top quality water filter, easy to fit and easy to change ensuring that your fridge uses only clean, fresh, purified water. Suitable for fridges with external filters and ¼" (6mm) hoses. This filter will treat up to 1500 US gallons of water but should be changed every 6 months regardless of use to avoid build-up of bacteria in the filter. This filter may also be retro-fitted to fridges with a 6mm water supply pipe such as Neff where no filter is supplied. Please ask for details. Compatible With: GE GXRTQLG and Hotpoint BL9808 Samsung EF9603 and WSF100 Daewoo DD7098 This filter may also be used as a replacement for the original filter on the following common Samsung fridges: RS21 DC MS1....RS21 DC NS1....RS21 DC SV1....RS21 FC NS1....RS21 FC SV1....RS21 FG RS1SS20WG1....SS20WH1....SS20WH2SS20WH3....SS20WH5....SS20XA1SS20SH1....SS20SH2....SS20S P1S24ADESWQN....S24AHESWQNSS20SP2 Or any Samsung which is fitted with original filter model WSF-100 or EF-9603 Also the following GE GXRTQ Daewoo DD7098 For LG fridges this filter may be used to replace the original BL-9808 filter. Supplied complete with the latest push fittings with safety collars to ensure trouble free installation. This filter is composed of High - Performance Activated Carbon; this is effective in removing Chlorine, Odour, Organic Contaminants and Pesticides. This cartridge has a maximum flow rate of 0.75 GPM, with a maximum pressure rating of 125 PSI. Service life is 1500 gallons. The result is great tasting purified water piped to your Fridge Freezer. This Filter will be dispatched within 24 hrs (business days only)</p>

Water Purifiers & Filters -/- Water Filters

2 Stage water filter upgraded Faucet.

Model 2 stage

2 Stage Water Filter with up graded Faucet as seen in picture. Why pay for bottled water when you can have filtered water on tap. THIS FILTER SYSTEM COMES COMPLETE WITH ALL CONNECTIONS AND FITTINGS.

1. A Quick Connect Self Sealing Valve for Connection to Your Mains Water Supply.

2. A Long Reach Chrome Faucet.

3. Two Metres of Tubing, (More can be supplied if needed).

4. Two Cartridge Filters perfectly matched to give you Great Tasting Water.

Each Filter Cartridges has a specific task giving a more effective filtration system than many expensive branded single filter systems.

The two cartridge filters come complete with secure compression fittings to ensure trouble free installation.

Two straight and two elbow connections are supplied for connecting the pipe work and filters, if a different combination of connections or extra pipe is required then please get let us know.

The First Filter is a High Capacity Polypropylene Sediment Filter with a 5 micron rating; this catches all the larger particles of Sand, Dirt, and Rust which would otherwise contaminate the second filter. This cartridge has a maximum flow rate of 0.75 GPM with a maximum pressure rating of 125 PSI.

The Second Filter is a Granular Activated Carbon Filter composed of High - Performance Activated Carbon; this is effective in removing Chlorine, Odour, Organic Contaminants and Pesticides. This cartridge also has a maximum flow rate of 0.75 GPM with a maximum pressure rating of 125 PSI, service life is 1500 gallons.

Work Tents -/- Budget Work Tent

Budget Pop up Work Tent

Pop up work tent 1.8 x 1.8 x 2.0 metres

Budget Pop Up Work Tents

Working in the open air may seem ideal, but weather conditions often make it unpleasant.

Unpleasant temperatures, wind, rain, snow and sunshine frequently make working in the open air very difficult.

Work tents over the years have proven to be an ideal solution. They are fully adapted to actual working conditions and meet the highest standards.

Welding Tent Umbrella
Welding umbrellas are very lightweight, compact, and fast and easy to put up. They are intended for minor jobs that nonetheless require protection from weather conditions.
These high-quality welding umbrellas have a white, translucent PVC coating for optimal translucence.
Furthermore, the cloth is non-flammable and will not drip. The sharp point makes the umbrella easy to fasten.
This umbrella comes with a fully detachable skirt which is 2 metres high not shown in Photograph.
