LIGHTLINE XL 2050 x 1500 mm

The trick with the "click":

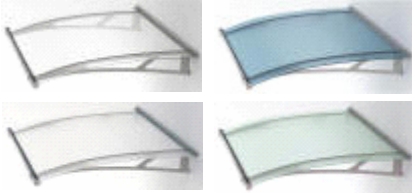

*1.25 watts x 10 h x 365 days x 0.20 EUR/kwh

LIGHT CREATES ATMOSPHERE

The modern **LIGHTLINE** design by itself will add flair and functionality to your front door. The typical bow silhouette with its transparent or colour frosted appearance will be an inviting eye-catcher. Create an additional optical highlight now with the **LIGHTLINE** lighting element. The low voltage system is safe and easy to assemble. Twenty-one watertight energy-saving flat LEDs per lighting element create an unobtrusive and soft play of colours. A day/night sensor switches the lighting on or off automatically according to light conditions.
